DETAILED ACTION

Election/Restrictions

Applicant's election of claims 1, 4-13 and 18 in the reply filed on 9/25/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 2, 3, 14-17, 19 and 20 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Specification

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

Claim Objections

Claims 1, 4-13 and 18 are objected to because of the following informalities: the claims comprise functional recitation that clearly describing the resultant variables instead of the interconnecting circuit. Claim 18 does not further limit the claim from which it is depended. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-13 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Thomas et al. (US 6,331,763). The reference discloses a protection circuit having, *inter alia*, a control circuit for operating a transistor switch wherein capacitor circuit is used for thermo-protection. Circuitry is provided to control the flow of current through the gates. These circuits maybe placed in an IC type wafers.
